parts

Available on order from our sales department

Robust !

Easy to assemble and maintain.

With its frame and back made of reinforced aluminium, its prime quality is robustness. It has few parts and is delivered almost fully assembled ; in just a few minutes you'll be ready to enjoy the pleasures of the sea. By simply rinsing your Tiralo with freshwater after each bathing session, you'll be making the most of it for many years to come.

Invented in 1999 by our ESAT, nearly 4,000 Tiralos have now been sold.

It moves !

An accompanying person pulls and steers the three-wheeled chair with the help of a tow bar fitted with a handle. The low-pressure wheels make it easy to pull it over sand and pebbles- some even use it on snow!

It floats !

Owing to its one-piece float/armrests, guard and wheels, the TIRALO 2 floats and offers optimum comfort for bathing in a sitting position. The armrests with handles keep the craft stable and have a clever, innovative system that makes use of the water pressure to automatically lock the float in place for bathing.

It's also a sun-bathing chair !

Its ergonomic and comfort-focused design makes the it easy for users to get from their wheelchair to the TIRALO 2 - and from the amphibious chair to the sand. Comfortable to use for a long time , due to its rounded, user-friendly design and the seats hypoallergenic material, agreeable to the touch, fits to the user's body and lets sand and water run through.
